

## **Health Outcomes for Transgender and non-gender conforming people: MSF internal discussion.**

The vigil was hosted by [Julie Papango](#) and had a panel of active trans-rights advocates from several trans-lead community organizations/networks based in Europe, Africa and Asia.

The panel discussion was guided by questions & solutions on “how to provide dignified care and promote access to trans and non-gender conforming people?” The panel made recommendations for statutory changes, a human rights approach to providing care to trans patients and better data-capturing methods (for better monitoring). The panel also acknowledged the effect of community stigma on access to care and the underreporting of trans deaths.
